

Education

We believe education is of utmost importance for these children. To this end we have placed 37 children into good schools in Atlantis and Melkbosstrand. In conjunction with the Melkbos Care Centre, these children are provided with daily transport to and from school, a healthy packed lunch, and all their school clothes, books, stationary and sundry items (school camps…etc) at our cost. The Care Centre helps with all aspects of their schoolwork and homework projects. It is a primary goal of ours to educate these children throughout school and then onto further tertiary education of their choice (ie tecnikon, university…etc).

We will also endeavour to assist with placement in attaining initial work experience. We believe these children have what it takes to make a substantial contribution to society.

EvalUNet EvalUNet - South Africa's premier developer of educational computer software - donated their range of software to the value of R6,000 to the Melkbos Care Centre. The learners are able to revise their school curriculum after school in fun and entertaining medium. The software covers school curriculum for learners from Grade 1 to Grade 12. It is especially effective for struggling learners.

"The software we produce does not focus on teaching a learner what a computer is all about. Instead, we've created products that turn the computer into a time-saving learning tool," says PRO Adrian Marnewick. "Our product range brings to the attention the benefit the Melkbos Care Centre has in producing better marks and a greater understanding in ALL learning areas."

Thank you EvalUNet for your generous donation and continued support. We are so glad that fun and education have been integrated into a software package so easy for the children to use.
